Mission Statement

Home Health care is an alternative service to hospitalization. Under physician supervision, the individual may choose to recover in the comfort and convenience of his/her home.

Valley Home Health, Inc. is the liaison between the individual, the family members and the health care providers (i.e. physicians, nurses, therapists, social workers, home health aids, etc.). In home setting, everyone is a significant "team player". Each team member's contributions are important to the health and wellbeing of the individual, thereby, making his/her recovery faster. Thus, it is Valley Home Health's belief is that home care is the best care.

How to Obtain Home Health Care Services

Normally, physicians, medical social workers, discharge planners, and/or case managers request home health services for patients by telephone or facsimile.

However, anyone (patient, family member or friend) can request home health care services from Valley Home Health, Inc. by simply giving us a phone call at:

24-hour care line

818-509-6764

Health Care Services Offered

Certified Home Health Aides (CHHA)

Assist with personal care, light housekeeping, and other nursing care as directed by and under the supervision of a Registered Nurse.

Physical, Occupational, Speech Therapists

Provide activities and exercises designed to help patients resume self-care, develop and restore communication skills. The Therapist assists patients in improving his/her abilities to perform activities of daily living.

Medical Social Workers

Assess the emotional, social, and environmental needs of the patients and utilize all available family and community resources to fasten patient adjustment and rehabilitation.

DAILY TELE MONITORING SYSTEM

Your patients deserve *exceptional* home health care every day....

Traditionally, home care provides your patients with a limited number of in-home visits. Now, when their medical condition warrants it, we can offer the option of monitoring their health status on a daily basis. Each day, the monitor will collect subjective and clinical data such as: heart rate, blood pressure, oxygen saturation, temperature when necessary, and weight. Peripherals such as a glucose meter, ECG can be attached for specialized patients. Each morning, the monitor talks the patients through the process in Patient's own language, and then automatically transmits the data to our offices where our staff will clinically review their condition and respond appropriately.

Valley Home Health, Inc. is the only agency with this capability in this area.
